

Status report (Yasu)

Cabling (Module-ROD-DF-FTK Tower)

- Determine a “draft” of ROD-DF connection (222 ROD vs 64 FPGA)

Data volume study is on-going

- In/output DF
- Inside DF
 - Inter-FPGA
 - ATCA Fabric
 - Inter-Shelf

After obtaining well solid, expand them to further cabling fine tunes study or hardware requirement (i.e. bandwidth, buffer size etc.)
